Sudan and Sweet Sudan Ask for prices

### PLEASE TAKE NOTICE

When ordering less than 10 lbs. of an item please add 5c per lb. to the 10 lb rate. To arrive at the per bushel price (where seed are quoted in BAG LOTS by the bu.), add 25c to the highest price quoted. The 25c pays for the extra bag, extra handling, etc.

JAN. 19, 1948

### D. & P. L. COTTON SEED

Now is the time to book your D. & P. L. 14 Mississippi Certified Blue Tag and Red Tag Cotton Seed —whether you want a bag or a ton or a car. The demand will likely be very heavy. The cotton market is good. A large crop will likely be planted. Be safe and buy your seed now. Write us what your needs are.

We shall have a limited amount of Foundation D. & P. L. 15 Cotton Seed. We are accepting bookings now, but it is impossible to fill any real large orders. There will definitely not be enough of these seed to go around, so please cover your principal requirements with our good Mississippi State Certified DPL. See below.

The Miss. Blue Tag seed are one year from the breeders and Red Tag are two. The seed are delinted and Ceresan-treated. They were grown on large plantations near the DPL people and ginned on private gins. They are the nearest thing to Foundation seed that money can buy. The germination of all seed is 80% or better. All bags carry certified tags of the Miss. Seed Improvement Ass'n. We quote f. o. b. here as follows:

	Per Pound	100 lb.	500 lb.	2,000 lb.
Miss. Certified Blue Tag	.12	.11 3/4	.11 1/2	
Miss. Certified Red Tag	.11	.10 3/4	.10 1/2	

Ask for special prices on carlots DPL 14.

### ALA. GROWN UNCERTIFIED

### KUDZU CROWNS

First Class. Large Field Crowns. Prompt shipments F. O. B. Alabama Shipping Points.

500 for \$9.00 3,000 @ \$15.25 M  
1,000 @ 16.00 M 5,000 @ 15.00 M

Shipping weight per 1,000 crowns about 60 to 80 lbs. 500 or more crowns are required per acre, depending upon width of rows. Ask for our "information" sheet. Account perishable nature of crowns, they should go by express. It is best to set them out in the dormant season. Kudzu can be put out later in 1948 than usual on account of the cold, late spring.

### MINERAL COMPOUND

We consider Corn King to be as good as any mineral compound on the market and far better than most brands. Ask for an analysis tag to get the full story. Feeding directions for all livestock are on the backs of the tags. "Minerals for stock are as vital as fertilizer for soil." Their use cannot be over-emphasized. They are particularly necessary for the proper development and growth of young animals, but all animals need them for health and vigor.

	Per Cwt.	100 lb.	500 lb.	2,000 lb.
Delivered prices by rail are		\$7.50	\$7.00	\$6.75

### FUNK'S "G" HYBRID CORN FOR THE SOUTH

More G-714 and G-717 Than Ever To Satisfy A Greater Demand. Order NOW.

We are Associate Growers and Distributors for Alabama for Funk Bros. Seed Co., pioneer hybrid seed corn breeders of the country. They are doing more research on Southern hybrid corn strains than any other breeders. All our Hybrid corn grown in 1947 in Alabama. Treated with Arasan to give better stands and higher yields. Sacked in 1-bu., branded, cotton bags.

G-714 is offered again as the most satisfactory hybrid yet developed for such states as Ala., Ga., the Carolinas, Miss. and La. It is very prolific weevil-resistant, possesses excellent shuck coverage, and is of medium maturity. Its production record in tests and field plantings permits us to recommend it strongly for general use in Ala. and adjoining states. It usually produces two large golden ears having excellent grain quality. This is the best hybrid yet introduced in this area, in our opinion. However, for the upper halves of Ala. and Ga., G-717 is highly recommended. In the lower halves, it is not recommended for cribbing, but it is for hogging off. G-717 often outyields G-714 a little. Many fine records have been made with these Hybrids by farmers and in contests of F.F.A. and 4-H club boys.

Our hybrid corn is graded according to size and shape to obtain uniform plantings. Round grains will give as good results as flat and they cost less per bushel. You can plant rounds with your present planter if you have the correct plates. A plate thick enough for beans is usually ideal for rounds. Both rounds and flats are graded into small, medium, regular and large grains. We will try to ship your preference if you let us know. The larger grains make the best appearance but the smaller grains are cheaper to use because a bushel will plant more acres, and they give us just as good results. A bushel of our hybrid corn usually will plant 7 to 12 acres—depending on the size of grains, distance between stalks, etc. Ask for your copy of our 1948 illustrated Funk's Hybrid Corn folder.

You are urged to plant Funk's "G" Hybrids in 1948 for greater yields and larger profits. Many farmers who have planted G-714 have sent in gratifying reports. Some use it for roasting ears for market. The use of Funk's Hybrids is increasing rapidly. There must be a reason! Bookings are far ahead of schedule. You are urged to send your order in promptly.
